DuraShield®

DuraShield is a long-lasting, 2-in-1 protective glaze that is fired directly into the ceramic for enhanced hygiene and easy maintenance. Its ultra-smooth, nearly pore-free surface allows dirt and limescale to wash away effortlessly. At the same time, positively charged ions create an invisible shield that eliminates 99.99% of bacteria within 24 hours.

The result is a cleaner, fresher bathroom with minimal effort—day after day.

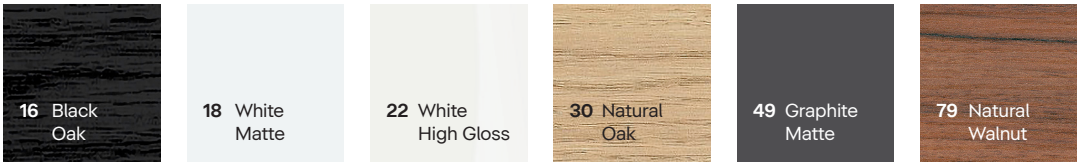

Transition Notice

Duravit is implementing a phased rollout of DuraShield® across select ceramic series. During this transition period, both DuraShield® and standard SKUs will appear in the catalog.

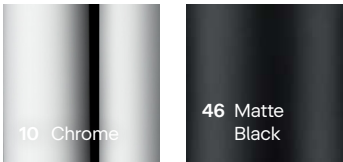

Availability and delivery timelines for DuraShield® products may vary as existing inventory is depleted and production is adjusted. Unless otherwise advised, we recommend continuing to order standard SKUs.

Updates will be communicated as the transition progresses. Please continue to check the portal or contact your customer solutions representative for specific inquiries.
